

LOCKERS

BISLEY

Helping you work better anywhere

Steel

DESCRIPTION

As Europe's leading manufacturer of steel storage, we understand how to get the best out of this great material. Our steel-only locker offering features the popular Monobloc and CLK lockers.

Sturdy, secure and long-lasting, they are ideal for back office use, or to equip changing facilities. Special attention has been given to the design and quality of steel lockers, such as in the concealed hinges, the clean lines and welded construction.

Not only do we offer the Monobloc and CLK ranges, we can provide bespoke designs to suit any personal locker storage needs.

All lockers come with a choice of colours, dimensions, internal fittings to suit the users needs and a range of locking options.

CLK LOCKERS

◀ CASE STUDY

Our client, a global brand, set a brief to provide bright, invigorating lockers and benches for their gym facility within one of their dedicated wellness centres.

With this in mind, we designed a bank of vibrant yellow Monobloc lockers to fit in with the aesthetic of the building. The client asked for an inspiring mountain graphic to be added to the front of the product, so our team decided to use a specific graphic vinyl supplier to achieve the best results.

Once the lockers had been manufactured in our factory in Wales, we assembled them and invited the vinyl graphics company to apply the graphics on site – allowing us to ship the finished product directly to the client overseas.

CASE STUDY SPECIFICATIONS

Product: Monobloc lockers

Internals: Naked

External: Vinyl graphic

Locking Options: Unusually no locks

Wood

DESCRIPTION

As well as our expertise in steel for which we are known, we understand the possibilities and limitations of a broad range of wood materials. So, if you require a more natural finish, or something better suited for front of house use, we have the skills.

Our wooden lockers are all designed and fitted to suit the needs of each individual requirement. Our bespoke service means you can specify lockers to fit in any space, whether it be a bank of lockers sitting in an alcove to a complete wall of flush storage.

Clients can choose from seven standard wood finishes, a choice of internal fittings and locking options to suit.

BESPOKE CLIENT FITTING

◀ CASE STUDY

Bisley was tasked by a leading, global insurance company to develop and install fitted wooden lockers. The main priorities were to have a robust, digital locking system, power within the lockers and neat perimeter installation to free up open plan working areas.

The process started with development meetings with the client to establish the bespoke requirements and design. This was followed up with a critique and approval system, until the final design was established.

The final product features a white, continuous pressure laminate finish and grey numbering to complement the existing surroundings. All lockers are complete with an individual power plug for laptop charging, interior light and Gantner hard-wired smart locks, with dual USB charging point on the lock housing. The locks can be utilised with staff access cards with integration onto the client's IT infrastructure, allowing enhanced functionality and central control.

CASE STUDY SPECIFICATIONS

Product: Bespoke continuous pressure laminate lockers

Internals: Ventilated back panels, power plug, interior light and adjustable shelf

External: Grey vinyl numbering

Locking Options: Gantner hard wired smart locks with two USB charging points to the lock housing

Wood & Steel

DESCRIPTION

80 years of experience with steel, combined with our new capabilities in wood materials makes for beautifully tailored, personal storage designs.

Whether you choose a mix of wooden and steel doors, or steel doors with a wooden wrap – the multitude of finishes, plus internal and locking options means we can help you create lockers to perfectly suit and represent your brand.

LATERALFILE LODGE

◀ CASE STUDY

Our client, a large international banking and financial services company, wanted to break up the traditional corporate workspace and introduce a more homely aesthetic.

Using our bespoke panelling and joinery expertise, we proposed a plywood wrap around steel lockers with writable glass back panels. The plywood softened the aesthetic of the lockers whilst allowing the reverse of the units to become functional, creating a casual collaborative area.

The original brief desired unpainted plywood, however, we proposed painting the end panels in brand colours to heighten the spec and look more like a piece of furniture you may find in the home. We provided open and closed shelving, allowing for additional storage space, without impacting on the existing floor space.

By arranging locker units in specific positions, we were able to create visible, yet open meeting areas without putting up permanent walls. Following the installation, we customised arrangements for the client's other locations, in keeping with the brand values and aims. Subsequently, the product has been introduced across

WOOD PLANT, NEWPORT

CAPABILITIES

When it comes to creating work environments, Bisley is the name people turn to for quality they can trust. We provide a full, end-to-end service for our clients, and our knowledgeable team and fantastic facility in Wales means we are in control of the process from initial design, right through to client handover.

With our expertise in steel, we put the best of our collective knowledge, skill and creative flair into everything we make - and it's earned us a reputation for excellence that is appreciated across the globe.

The latest addition of our wood plant at our factory, means we now have the capability to easily mix materials, create new wood-only products and experiment with an even broader, modified offering.

We regularly accommodate bespoke requirements – from having existing Bisley products finished in an organisation's brand colours, to resizing units to match a specific layout.

Whatever you need, we'll take care of it.
