

Company Profile

Mission Statement

“To create a centre of world class low cost manufacturing excellence, together with long term secure employment for all our employees”

Company Culture

Bisley Office Furniture is the UK's largest office storage manufacturer, privately owned, all profits are returned to the company as investment in plant, machinery and production premises, in the past 10 years over £50 million has been invested in manufacturing technology.

Bisley has three UK sites, in Bisley and Newport plus a showroom in Great Portland Street, London, which together occupy around 55,000 square metres and employ over 700 people. In addition it has sales offices in France, Holland, Germany, Ireland, Spain, Dubai and North America.

Our aim is to provide storage solutions that exceed the current demands of our customers with built-in adaptability to respond to the changing needs of the modern day office environment.

Highly ethical as a company, no commissions or bonuses are paid, resulting in the company, as a whole, benefiting from any business.

Bisley products are available from distributors throughout the world, resulting in more than 40% of production being sold overseas in some 50 countries: This was recognised when the company received the Queens Award for Export Achievement in 1992 and again in 1997.

Differentiators

All Bisley manufactured products are “business specified” to customer requirements.

Complementing each product's technical specification the Bisley business specification ensures that every Bisley product is backed by a well managed, customer focused company.

All products are British made in our factory, minimising the impact on the environment and lowering the product's carbon footprint.

With a turnover of £60m, Bisley have the major share in the UK steel office furniture market.

Outside the car industry, Bisley is the largest purchaser of steel in the UK. Bisley demands a high specification of raw material to match the small tolerances to which products are manufactured.

Due to investment waste has been reduced to a minimum and efficiency has been increased. Bisley uses steel that contains already recycled material and can be totally recycled at the end of its lifespan.

All products, be it entry level or Bisley LateralFile™ are designed with attention to detail and are rigorously tested and approved to the relevant BS EN standards – copies available on request.

Products are robust and durable with relevant guarantees supported by two service engineers.

Timeless style, design innovation, quality and longevity are united in storage solutions from Bisley – you can be sure that Bisley storage will accommodate whatever the future holds.
