## Desk Filing

Bisley's **Desk Filing** range is an update on a classic, offering maximum versatility within a lightweight design. With a shallower profile and a choice of filing and stationery drawer combinations, the Desk Filing range slides neatly under your worktop. Alternatively, using two units together, they can support a worktop to create a desk in its own right. Made from steel and powder coated with a highly durable smooth finish, Desk Filing cabinets are the perfect solution for the home-office.

**Desk Filers are a versatile storage solution for any busy working environment.**

---
