## Industrial Storage

Bisley ToolStor tool cabinets are modern and ergonomically designed workshop drawer units. Heavy duty galvanised drawers and telescopic slides uniformly distribute loads to ensure safe and smooth opening and closing, even when fully laden. Our tool cabinets can work either as a standalone cabinet or as part of an integrated tool storage system or fitted workshop. A variety of internal drawer options allows loose tools, fixed tools, small parts and assembly components to be stored efficiently in one place.

### **Versatile and professional storage system for your tools and components**
